PROFESSIONAL SUMMARY

Frontend Developer with 1 year and 3 months of experience building scalable, high-performance frontend modules and features within large web applications using React.js, JavaScript, TypeScript, HTML, and CSS. Skilled in developing and optimizing product features across multi-platform systems (User, Advertiser, Admin), integrating REST APIs, and building responsive interfaces.

PROFESSIONAL EXPERIENCE

Junior Frontend Developer

Sawara Solutions Pvt Ltd (Promilo)

02/2025 – Present | Bengaluru, India

- Developed and maintained **5+ modules (Application Form, Campus Visit, Prospect Grouping, Intent Engine)** across User, Advertiser, and Admin platforms using React.js.
- Built reusable and scalable UI components, **reducing development time and improving UI consistency across applications.**
- Integrated frontend with REST APIs and updated API integrations for smooth data flow.
- Implemented analytics events to track user interactions using non-blocking APIs without affecting performance.
- Optimized application performance by improving component rendering and minimizing unnecessary re-renders using React.js best practices.
- Resolved frontend bugs, improving application stability and user experience.
- Managed tasks using **Azure DevOps (VSTS).**

EDUCATION

MCA (Master of Computer Applications)

Aurora's Post Graduate College

12/2021 – 11/2023 | Hyderabad

CGPA : 7.50

Bachelor of Science (MPCs)

University Post Graduate College, Secunderabad(OU)

07/2018 – 09/2021 | Hyderabad

CGPA : 9.16

SKILLS

Frontend:

- HTML, CSS, Bootstrap, JavaScript, and React.js

JavaScript:

- Solid understanding of JavaScript ES6+ features, including destructuring, spread/rest operators, and template literals.

React.js:

- Proficient in functional components, Hooks, state management, lifecycle methods, and Context API

Backend:

- Working knowledge of Node.js and Express.js (REST APIs, JWT authentication).

Tools:

- Git, GitHub, VS Code, and Postman

PROJECTS

E-Commerce Platform (MERN Stack)

- Developed a full-stack e-commerce application with product management, cart functionality, and secure authentication.
- Implemented shopping cart functionality for seamless cart management and user experience.
- Implemented admin functionality to upload products with images and descriptions, while user authentication and authorization were managed through JWT and bcrypt for secure login.
- Integrated Cloudinary for image hosting and management.

Task Management Application (MERN Stack)

- Developed a Task Management web application using Node.js, Express.js, React.js, and MongoDB.
- Implemented user authentication with JWT and enabled secure access to application features.
- Built full CRUD functionality for tasks, allowing users to create, update, and delete tasks efficiently.
- Designed a responsive frontend with React.js and integrated APIs using Axios for seamless data handling.

My Portfolio

- Developed a full-stack portfolio application using React.js, Node.js, Express.js, and PostgreSQL with responsive UI and dynamic content.
- Implemented JWT-based admin authentication with protected routes for managing user messages.
- Built a real-time chat system using Socket.IO with live messaging, typing indicators, and online status.
- Integrated a contact system with PostgreSQL storage and automated email notifications.
